In short, Violence against women and girls is a human rights violation, and the immediate and long-term physical, sexual, and mental consequences for women and girls can be devastating, including death. Violence negatively affects women's general well-being. So It is very important to study this topic. It can help children gain a sense of personal control by talking openly about violence and personal safety.

Affected ladies share her experiences with us. Psychological support to affected girls / women and bring some happiness in their life.
