BOOK BANK FACILITY

Our Institute Library provides Book Bank facility to the students. Main aim of Book Bank is to encourage the meritorious students by providing informational and educational assistance from the institute itself. In an academic institute, every user may not be economically rich. User with sound finance can buy the books from their own but user with poor economic background can't afford to buy their required information sources. So, for their study materials, they have to totally rely on the library. But 'Limited collection of libraries' reason which prevents issuing a particular document to a few students at a time. Practicing book bank services in library can help to overcome such a situation to some extent. Book Banks are developed for the upliftment of the economically backward, differently abled, backward class students and to reduce the rate of failure among them.

Features of e-Granthalaya Software

Sr. No	Name of the software	Nature of Automation	Version
1	e-Granthalaya software	Fully	3.1Version

Our Library software data is also available on KOHA software which has been recently implemented in all Libraries of Bharati Vidyapeeth.

Subscription to E-Resources:

Our library is a regular subscriber of N-List since 2011. The N-LIST project provides access to e-resources to students, researchers and faculty from colleges and other beneficiary institutions through server(s) installed at the INFLIBNET Centre. The users from colleges can now access e-resources and download articles required by them directly from the publisher's website once they are duly authenticated as authorized users through servers deployed at the INFLIBNET Centre. The software allows for the automated circulation (issue-return) of books and enables quick access to bibliographic, location, and availability information for the books. Barcode stickers are used to access books through computerized access. There is a separate computer for library users for students and faculty to search the book on the OPAC in the library.

Library user tracking system software

In the current age of technology, the trend of libraries seems to be declining a bit and this is a serious matter. For this, the librarians have different plans in the library to motivate the students to come to the library. A huge challenge facing librarians is to increase the number of readers. Librarians are particularly concerned with planning how best to serve members. It is essential that we have a record of every member who comes to the library at that time. Library membership enumeration is a traditional process in libraries. A record of every member coming to the library is taken while entering and leaving the library. The library keeps a record of every member coming and going to the library, which member came when and how much time did he spend in the library. We use Library User Tracking System Software for digital attendance of library user. By using this software, we generate the monthly /yearly reports of library users.
